

Computer Donation Guidelines

Moultonborough School District

Technology Department

Thank you for offering to donate a used computer to our school. We truly appreciate your thinking of us. Our school doesn't require the newest "state of the art" equipment, but on the other hand, we can't always put older equipment to good use. Networking, software and research done at our school requires certain technical criteria.

Listed below are the minimum specifications for equipment we can consider accepting.

For Macintosh donations...

- Capable of running OSX 10.4.9
- working hard drive (20 gig minimum)
- working color monitor
- working CD-ROM drive
- working Ethernet port

For Windows donations...

- Capable of running Windows XP SP2
- working hard drive (20 gig minimum)
- working color monitor
- working sound card
- working CD-ROM drive
- working Ethernet port

For printer donations...

Networkable Laser Printers Only
(2001 or later)
